Education

University of Washington - Seattle, WA

Bachelor of Science in Computer Science

Relevant Coursework

- Data Structures & Parallelism
- Object-Oriented Programming I–III (Java)
- Systems Programming (C/Assembly)
- Database Management (SQL)
- Software Design & Implementation
- Probability & Statistics

Technical Skills

Languages: Java, Python, C, C++, SQL (PostgreSQL, SQLite3), Assembly, TypeScript, HTML/CSS, R

Frameworks & Tools: React, GraphQL, NumPy, Pandas, scikit-learn, TensorFlow, PyTorch, GDB, Insomnia, Git, Figma, Azure DevOps

Experience

Incoming Software Engineering Intern

June 2026 – Sep 2026

Microsoft AI (Monetization Engineering)

Redmond, WA

Research Assistant

Jan 2026 – Present

UW Center for Research and Education on Accessible Technology and Experiences (CREATE)

Seattle, WA

- Built a Python tool using candidate descriptor scores to quantify systemic bias in generative AI models.
- Implemented N-gram language models to increase bias detection granularity in model-generated hiring summaries.
- Automated evaluation of large-scale model outputs to support more inclusive algorithmic frameworks.
- Selected to present research findings to an audience of 2,500+ participants and peers at the 29th Annual UW Undergraduate Research Symposium, one of the nation's largest undergraduate research conferences.

Explore Intern (Software Engineering & Product Management)

Jun 2025 – Sep 2025

Microsoft AI

Redmond, WA

- Engineered a Copilot-powered web extension for Microsoft Clarity using React, TypeScript, and GraphQL.
- Optimized GraphQL queries and data serialization to reduce payload sizes and improve load speeds by 25%.
- Validated API endpoints via Insomnia and managed engineering tasks within Azure DevOps in an Agile pod.
- Defined feature requirements and success metrics, coordinating with pod members to align engineering tasks with product goals.

AI/ML Fellow

May 2025 – Nov 2025

Break Through Tech AI (Cornell Tech)

Remote

- Selected as 1 of 1,000 fellows nationwide for a Cornell-backed ML program.
- Developed ML solutions across 100+ hours of training, mastering the full ML life cycle.
- Applied deep learning concepts to computer vision and NLP tasks, incorporating cross-validation, feature selection, and fairness principles.

Leadership & Service

Resident Advisor

Aug 2025 – Present

UW Housing & Food Services

Seattle, WA

- Act as first responder for 500+ residents, managing emergencies and crisis intervention with composure.
- Mediate interpersonal conflicts and lead monthly community seminars on leadership and academic development.

Co-President

2024 – Present

Collective Youth Program

Seattle, WA

- Lead technical workshops for BIPOC students, teaching foundational programming concepts to empower the next generation of tech talent.
